

Manan Kundra

Delhi , India / +91 9310099345 | kundramanan14@gmail.com | linkedin.com/in/manan-kundra/ | GitHub: github.com/Manankundra

Summary

Full Stack and AI/ML-focused developer with experience building React applications, computer vision tools, recommendation systems, and business automation software. Skilled in Python, FastAPI, React.js, OpenCV, machine learning, and problem-solving, with hands-on experience developing real-world projects and collaborating on client-facing software solutions.

Education

Bachelor of Computer Applications — GGSIPU - 7.7 CGPA (Till Last Semester)

Final Semester Completed / Result Awaited

Class XII (CBSE) – 77%

(2023)

Experience

AI/ML Trainee & Intern — CodingBolt, Delhi (Oct 2025 – Mar 2026)

- Completed a 6-month AI/ML training program with hands-on project development.
- Built machine learning models using scikit-learn and performed data preprocessing
- Worked on recommendation systems and classification problems using real-world datasets
- Strengthened debugging, problem-solving, and structured coding practices

Data Science Intern – Deloitte (Feb 2025 – Mar 2025)

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on structured datasets
- Worked with structured datasets to support data-driven decisions
- Generated insights to support data-driven decision making

Python Programming Intern – CodTech IT Solutions (May 2025 – Jun 2025)

- Worked with Python for data processing and API integration
- Improved data quality through validation and transformation techniques
- Built scripts for handling and analyzing structured datasets

Skills

Languages: Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3

Backend: Node.js, FAST API

AI/ML: Scikit-learn, Pandas, NumPy, OpenCV, TF-IDF, NLP

Tools: Git, GitHub, VS Code, Vercel

Projects

Pixelator | React.js, FastAPI, OpenCV, NumPy

GitHub: <https://github.com/Manankundra/Pixelator-frontend> | **Live:** pixelator.vercel.app

- Built an image processing web app allowing users to upload images and apply multiple computer vision operations.
- Implemented OpenCV features including grayscale conversion, edge detection, blur, thresholding, and image enhancement.
- Developed the application using React frontend and FastAPI backend.

HRM Task & Payment Management System | React.js

GitHub: <https://github.com/hrm00135-ai/Front-end> | **Live:** <https://front-end-updated-eta.vercel.app/>

- Developed a role-based task management system supporting 3 user roles: Super Admin, Admin, and Employee.
- Implemented secure authentication and authorization workflows with role-specific dashboards and access control.
- Built task assignment, approval, and payment tracking modules with image-based task verification.
- Designed progress monitoring dashboards to track task completion and employee performance.

Movie Recommendation System | Python, SQL, Scikit-learn, NLP

GitHub: <https://github.com/Manankundra/movie-recommendation/tree/main>

- Built a hybrid movie recommendation engine using content-based filtering (TF-IDF, Cosine Similarity) and collaborative filtering techniques.
- Processed and merged datasets containing 15,000+ Hindi and English movies using SQL joins and data preprocessing pipelines.
- Implemented recommendation logic capable of generating Top-5 personalized movie suggestions based on user preferences and movie similarity.
- Optimized text vectorization and similarity calculations for scalable recommendation workflows.

Certifications & Achievements

- AI/ML Training & Internship – CodingBolt (2026)
- Data Science Internship – Deloitte (2025)
- Smart India Hackathon 2025 (Internal Round)
- HackHazards 24 (24-hour Hackathon)
